

## ENVIRO-STRIP 2000 – TECHNICAL DATA SHEET

---

### Non-Methylene Chloride Paint Remover

#### Introduction

Enviro-Strip 2000 was formulated by Kam Biotechnology as a substitute to toxic methylene chloride paint strippers and carbon removers.

The formulation contains several esters complex, furfural alcohol and a proprietary carrier that breaks the bond between paint and metal almost as fast as methylene chloride based paint removers, but is completely safe to aquatic life and the environment.

#### Applications

Enviro-Strip 2000 is the ideal stripper for epoxy paint, lacquer, polyester and some synthetic paints.

It is safe to use on aluminum.

#### How to Use

Enviro-Strip 2000 can be used as a spray or dipping solution.

#### Physical Properties

**Appearance/State:** colorless liquid

**Odour:** odourless

**Boiling Point Range:** 174 – 214°C

**Specific Gravity @ 23°C:** 0.987

**Solubility in Water:** dispersible

**pH 1% by volume:** 7
